Kaden Lee

Education

- **University of California, San Diego** — *09/2025 - Present*
  MS in Mechatronics and Controls — GPA: /4.0
- **University of California, Santa Barbara** — *10/2020 - 06/2024*
  BS in Mechanical Engineering — GPA: 3.74/4.0

Work Experience

- **FoodTools** — *07/2024 - 07/2025*
  Jr. Mechanical Design Engineer — Santa Barbara, CA
  - Designed custom parts and assemblies for food portioning machines in SolidWorks
  - Refined the machining process of intricate parts using Fusion 360 Manufacturing
  - Drafted and updated engineering drawings in SolidWorks
  - Assisted assembly team in assembling electrical panels, pneumatic control systems, and machinery
  - Developed graphical user interfaces (GUIs) with Python to streamline workflow
- **Introba** — *12/2023 - 06/2024*
  New Technologies Research Intern — Santa Barbara, CA
  - Worked in an interdisciplinary team of engineers and environmental equity experts to develop the UCSB Clean Energy Master Plan
  - Researched energy storage technologies and HVAC systems that were to be implemented in a central utility plant
  - Developed calculators that modeled the energy needs of buildings around the UCSB campus in Microsoft Excel
  - Designed a seawater heat exchange system in SolidWorks
- **UCSB Mechanical Engineering Machine Shop** — *12/2022 - 12/2023*
  ME12s Remedial Tutor — Santa Barbara, CA
  - Supervised 8 students twice per week in the Mechanical Engineering Machine Shop
  - Taught students how to use manual lathes, CNC mills, drill presses, measurement tools, and other shop-related equipment
  - Guided students in the fabrication of parts for a compressed air motor
- **Meissner** — *06/2023 - 09/2023*
  Research and Development Intern — Camarillo, CA
  - Conducted research on membrane porosity characterization
  - Developed test method to determine porosity of membranes across varying porosities
  - Designed and machined laboratory equipment using manual mills and lathes
  - Performed dynamic mechanical analysis to determine the effects of solvents on mechanical properties of epoxies
  - Completed formal documentation, technical reports, and presentations to share results and data

Projects

- **Senior Capstone Project** — *09/2023 - 06/2024*
  Student — Santa Barbara, CA
  - Collaborated in a team of 6 to design a vehicle to be used as a physical therapy device for young children with cerebral palsy or other severe motor impairments
  - Integrated brushless DC motors, Arduino Mega, and other electrical components into a mechanical system
  - Designed and modeled multiple components for the device using SolidWorks
  - Utilized finite element analysis to evaluate mechanical components of the system under various loads
  - Fabricated major mechanical components using techniques including milling, water jetting, and 3D printing
  - Conducted testing such as load tests, speed tests, and live testing with children
  - Received the Distinguished Technical Achievement in Mechanical Engineering award

Certifications and Courses

- **Coding for Everyone: C and C++ Specialization** (UCSC / Coursera) — *03/2025 - 05/2025*
- **Machine Learning with Python** (IBM / Coursera) — *03/2025 - 04/2025*

Technical Skills and Interests

Skills: MATLAB, SolidWorks, CAM, Igor, COMSOL, Python, Microsoft Office, C++, ROS2
Areas of Interest: Materials, Design, Mechatronics, Automation, Robotics
